NOTICE TO CONTRACTORS
RFP #1213-180
Wastewater Reclamation Plant Digester Rehabilitation Project – Phase I
PWP# CC-2013-238

May 22, 2013

Addendum No. 1

As of May 22, 2013, the following questions and comments have been received.
Answers are provided in italics.

1. Is it all or none or can we bid on only the clean-out and not the repair work?
Yes.
2. We are wondering if your facility accepts dewatered sludge cake? *The Carson City Landfill does accept dewatered sludge cake as long as it passes the paint filter test.*
3. If so, we would like a quote for hauling (if available) and disposal at your facility? *For this project, the contractor will be responsible for the sludge hauling. For this project - There are no dewatered sludge disposal costs at the Carson City Landfill.*
4. I was wondering if you could please provide information about the estimated tonnage to be removed from digester #1? *Estimated Solids to be removed: 12.1 wet tons (145,000 gallons X 8.34 $\frac{\text{lbs}}{\text{gallon}}$ X $\frac{1\text{ton}}{2000\text{lbs}}$ X 2% T.S.)*
5. Also, the date that the digester was last cleaned was never filled in on the bid docs. Where is the sludge from the wwtp presently disposed of? *Date the digester was last cleaned was in 2008. Records are not available.*
6. When was the digester last cleaned? *See 5.*
7. Is there testing on sludge for landfill disposal? *Paint filter test*
8. What is the estimated budget for the digester cleaning and disposal portion of the bid? *That component was not broken out as part of the engineer's estimate.*
