

CARSON CITY WATER CONNECTION CHARGES

Meter Size	Effective 7/1/2016	Effective 7/1/2017	Effective 7/1/2018	Effective 7/1/2019	Effective 7/1/2020
Meters up to 1":					
5/8"	\$1,051	\$1,648	\$2,246	\$2,843	\$3,440
1"	\$2,083	\$3,712	\$5,342	\$6,971	\$8,600
Meters 1 1/2" or larger:					
Charge per maximum day GPM	\$1,244	\$2,488	\$3,731	\$4,975	\$6,219
Multifamily:					
Multifamily per unit	\$388	\$549	\$710	\$871	\$1,032

Definitions:

Maximum day GPM: means water use as measured in maximum day gallons per minute over a 24 hour period. Example: a Water Equivalent Residential Customer (WERC) is 425 gallons per day on an annual average. The maximum day could be a peaking factor of 3.0 = 1,275 gallons per day or 0.885 gallons per minute.

Multifamily: Service to a customer supplied for residential purposes in a master metered building with three or more dwelling units.

Notes:

Effective 7/1/2021, the connection charges will be increased annually based on the *Engineering News Record's* Construction Cost Index, with a cap of three percent (3%) per year.

All developments, other than multifamily, will be charged based on meter size. Multifamily developments will be charged based on the number of proposed units. Customers using meters 1 1/2" or larger will be charged based on an estimated maximum day water use in gallons per minute which will be determined by the Public Works Director or his or her designee, based on water usage information provided to the City through the completion and submittal of water usage information data or from previously supplied data generated by the review of similar uses or developments.

Refer to CCMC 12.01.030 for further information or details.

The connection charge rate plan was approved by the Board of Supervisors on August 20, 2015.
