Carson City, Nevada Full Cost Allocation Plan Fiscal Year 2012

COST ALLOCATION METHODOLOGY

INTRODUCTION

The Full Cost Allocation Plan was prepared using a consistent approach and treatment of direct or indirect costs; in no case have costs charged as direct costs to programs been included as indirect costs. Actual expenditure information was obtained from the financial statements for the year ended June 30, 2012. Statistics used to allocate costs were taken from FY 2012 data by performing one hundred percent counts, or in some cases, conducting a representative sample period count.

STEP-DOWN ALLOCATION PROCEDURE

A double step-down allocation procedure was used to distribute costs among central services and to programs that receive benefits. The double step-down procedure initially requires a sequential ordering of agencies. Department indirect cost allocations are then made in the order elected to all benefiting programs, including cross allocations to other central services. To insure that the cross-benefit of services among central services is fully recognized, a second step-down allocation for each central service is made. Costs allocated to each central service consist of the following:

First Allocation – the actual operating expenditures, exclusive of unallowable items (i.e. capital expenditures, interest expense, and general government costs as designated by OMB Circular A-87), plus all allocated costs from other central services, which have been identified up to this point.

Second Allocation – costs from other central services made subsequent to that section's first allocation. With respect to the double step-down methodology, two important points should be noted:

- 1. The initial sequencing of Central Services was made in consideration of the ordering which maximizes the benefits of the services, and
- 2. After the second allocation of each central service, that service was "closed" and could not receive and additional allocation from other central services.

To ease comprehension and to avoid unnecessary bulk in the plan, the first and second allocations are shown on the same schedule within the plan.

COST ALLOCATION METHODOLOGY

FORMAT

A Table of Contents is included at the beginning of the Plan. The allocation of costs has been accomplished in the same order as shown in the Table of Contents. The Table of Contents also permits the ready identification of the following summary data and sections of the Plan:

Summary Data - Three summary schedules are provided at the beginning of the Plan:

- 1. Allocated Costs by Department (Schedule A) provides the costs allocated from each central service to each operating department. The central service departments are listed on the left side of the page and the operating programs detailed in the plan are listed across the top. With a total at the bottom of the page.
- 2. Summary of Allocated Costs (Schedule C) summarizes the costs allocated from each central service. The column labeled "Total Expenditures" is the total costs of the central service department. The column labeled "Cost Adjustments" are any costs added or deducted from the central service. The column labeled "Total Allocated" is the amount allocated to each operating department (this agrees with Schedule A).
- 3. Summary of Allocation Bases (Schedule E) provides the bases used to allocate the costs for each function of every central service.

Sections – sections on each central service are presented in the following format:

- 1. Nature and Extent of Services a narrative description of the central service and each function that was identified. Also described are the allocation bases used for each function and any other relevant information on expenditures.
- 2. Costs to be Allocated presents the total costs to be allocated based on actual expenditures from the financial statements. Allocated additions represent costs allocated to a central service from other central services.

COST ALLOCATION METHODOLOGY

FORMAT (Continued)

- 3. Costs to be Allocated by Function costs for each Central Service are functionalized to the extent deemed necessary to insure the application of allocation basis which most closely correlate with the benefits derived by receiving programs. Total costs allocated are the same as reflected on the previous schedule. Functions of the central services are listed across the top of the page and a detailed schedule is provided on each function.
- 4. Detail Allocation detailed schedule of the allocation of each function is provided on all allocated functions except for General Administration. Costs of General Administration are re-allocated to all other agency functions based on functional costs unless otherwise noted.
- 5. Departmental Cost Allocation Summary provides a summary of the costs allocated by function. The programs that receive allocations are listed on the left side of the page and the central service functions are listed across the top.

INTERVIEWS
