**NOTICE TO CONTRACTORS**  
**Advertised RFP 1415-104**  
**On-call Engineering Review Assistance**

**Addendum No. 1**

The following are based on Request for Information Items received prior to December 9, 2014:

1. Can you please provide more detail regarding the scope of services anticipated under this RFP? For example, is this a review of all private development submittals for complete engineering review, including grading, drainage, access and roadway, subdivision maps, parcel maps, divisions of land, building permits, special use permits, etc?

Private development submittals for complete engineering review, water/sewer, grading, drainage, access, roadway, subdivision maps, parcel maps, engineering side of building permits for periods/projects that exceed normal workload capabilities.

2. Will there be any inspection services associated with the reviews? Geotech or materials testing?

No.

3. Will there be a surveying review of calculations, parcel maps, boundary line adjustments, reversions to acreage, etc?

Possible but I envision mainly engineering related aspects of large projects or many small projects over normal workloads.

4. Is this an ongoing service that the City has contracted out before or is this a new approach to private development review?

New approach.

5. Can pages be double sided and not count in the page count. Yes
