

Bruce R. Scott, PE, PLS, Principal

For over 40 years, Mr. Scott has been active in Nevada water resources, engineering, and surveying. After 4 years with the Nevada Division of Water Resources, he co-founded a consulting engineering firm in Carson City, Nevada. In 1978 he was a founding principal of Resource Concepts, Inc. with direct responsibilities in engineering, surveying, and water rights. That began a long history of successful projects and satisfied clients. Resource Concepts, Inc. counts a number of clients for whom professional services have been provided since the late 1970's. Among these are clients such as the Town of Minden and the Minden-Gardnerville Sanitation District, for whom Mr. Scott serves as their respective engineer. He has been involved in many engineering and construction projects, bringing sensitivity for the resource with experience and practicality in design and construction.

Mr. Scott heads one of the most active and well-respected water rights groups in the state of Nevada. Since 1978 he has represented hundreds of water right applicants, and filed thousands of documents with the Division of Water Resources. He is a respected water resources professional who has been tapped by three different Governors to serve on the Nevada State Board for Financing Water Projects.

Mr. Scott is a strong believer and practicing professional in the collaborative development, planning, and implementation of projects. The multi-disciplinary resource-sensitive approach to projects is a founding principal of Resource Concepts, Inc. Mr. Scott serves as the administrative professional for Resource Concepts, Inc. He is active in the community as well as in his professional capacity.

Recent Representative Projects:

Carson Valley – Carson City Regional Water Transmission Main and System Connection – Mr. Scott has worked closely with the Town of Minden, Carson City, Douglas County, Indian Hills, and the Carson Water Subconservancy District in concept development, preliminary project analysis, and project development, design and implementation for a regional water system which combines the water service areas of Minden, Douglas County, Indian Hills, and Carson City. This project includes over \$30 million of investment in new infrastructure to provide a good quality water supply to areas of Douglas County, Indian Hills, and Carson City where arsenic, uranium, and other constituents created water quality limitations. This project is scheduled to be online in early 2014.

Water Rights and Water Resources – Mr. Scott and the RCI water rights team provide support for hundreds of clients with respect to water rights administration, filings, maintenance, and water rights issues. RCI takes great pride in handling water rights for everyone from the largest gold mine in Nevada to an individual with the need for a small domestic water permit. The water rights team provides services at all levels to all types of clients, dealing in both surface and groundwater resources within the state of Nevada.

Overall Engineering Supervision for Resource Concepts, Inc. – Mr. Scott is the Principal in charge of engineering. This involves the overall responsibility for numerous registered professional engineers, working on a wide variety of engineering and related resource projects. RCI has an outstanding reputation with regard to the quality of its design work, the care with which projects are conceived and executed, relations with clients, and the ability to get the best from every contractor, minimizing issues and professionally and promptly dealing with questions or concerns. RCI's focus is to solve problems and not point fingers or blame others. RCI represents its clients in a fair, straightforward, and honest way. Our overriding goal is to have a project done well with a satisfied client who looks to RCI the next time they need professional services.
