And the reason, when you get bigger than a 1-1/2 inch meter, we change that so that ... typically commercial users are not being charged just because of the size meter. They're being charged on how much water they use which is fair to the system and not just some number pulled out of the air. ... We looked, with the help of our consultant, specifically to make sure that the rate we're charging is fair for every user. That's why we went to the hybrid approach.”
